- Proven Thermo Top technology with millions in use
- High output (17,200 BTU/h / 5 kW) in a small package
- Blink code diagnostics

Engine pre-heat, fuel savings and improve DPF performance.

The Thermo Top Evo utilizes proven technology to produce high heat output in a compact design for reliable engine pre-heating, fuel-savings and emission reduction. The powder coated, steel enclosure box helps protect the heater from the elements. This allows for exterior mounting and more application flexibility.

Featuring advancements in the fuel delivery system, controls, diagnostics and flexible installation, the Thermo Top Evo improves the user experience and continues the Webasto heritage as a leader in idle-reduction, fuel efficiency and emission control.
